Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 12 is objected to because of the following informalities:
 - a. in line 7 of claim 12, "at" should be inserted immediately after --at--;
 - b. in line 4 of claim 12, "disc" should be changed to --disk-- to be consistent with other instances of the term "disk", see line 2 of claim 12.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 2-5 and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by French Patent Publication 2 741 416.

French Patent Publication 2 741 416 discloses in figure 2, a worm gear 2 meshing with a spur-toothed wheel 3 wherein said spur-toothed wheel comprises a generally cylindrical first wheel disc 4; a generally truncated cone shaped second wheel disc in contact with said first wheel disc at a first interface; and a generally truncated cone shaped third wheel disc in contact with said first wheel disc at a second interface. Each of said first, second, and third wheel discs having helical gearing and a plurality of teeth including crests on a periphery thereof, said crests of said plurality of teeth on said second and third wheel discs being inclined radially inward towards said first interface and said second interface respectfully.

Regarding claims 4 and 5, the limitation as to the spur tooth wheel being designed as a single piece and produced by injection molding does not further limit the invention as claimed.

Art Unit: 3682

Even though product-by-process claims are limited and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. See MPEP §2113.

Response to Arguments

4. Applicant's arguments with respect to claims 12 and 13 have been considered but are moot in view of the new ground(s) of rejection. Although the teeth of Voigtlander et al. may not converge radially inward, the teeth of French Paten Publication 2 741 416 do converge radially inward.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
